

Preparing today's students for tomorrow's world.

February 15, 2020

Dear Parents and Community Members:

We are pleased to present you with the Annual Education Report (AER) which provides key information on the 2019-20 educational progress for the Monroe County Educational Center. The AER addresses the complex reporting information required by federal and state laws. The school's report contains information about student assessment, accountability, and teacher quality. If you have any questions about the AER, please contact our building administration for assistance.

The AER is available for you to review electronically by visiting the following web site https://www.mischooldata.org/annual-education-report-1/ or you may review a copy in the main office.

For the 2019-20 school year, schools were identified using definitions and labels as required in the Every Student Succeeds Act (ESSA). A Targeted Support and Improvement (TSI) school is one that has at least one underperforming student subgroup. An Additional Targeted Support (ATS) school is one that has a student subgroup performing at the same level as the lowest 5% of all schools in the state. A Comprehensive Support and Improvement (CSI) school is one whose performance is in the lowest 5% of all schools in the state or has a graduation rate at or below 67%. Some schools are not identified with any of these labels. In these cases, no label is given. Our school report shows the following results:

Monroe County NA Educational Center	Key Initiative to Accelerate Achievement Student identified goals based on assessment identified needs and intervention based on student identified goals
--	---

When reviewing the AER, it is important to note that these reports contain the following information:

#### **Student Assessment Data**

Includes the following three assessments: M-STEP (Michigan Student Test of Educational Progress), MI-Access (Alternate Assessment), and College Board SAT. Presents assessment information for English language arts and mathematics for grades 3 to 8 and 11, and science for grades 4, 7, and 11, compared to state averages for all students as well as subgroups of students. The report helps users to understand achievement performance within grades and schools, and to make comparisons to district, state, and national achievement benchmarks.

# Accountability – Detail Data and Status

The accountability portion of the AER includes assessment proficiency and participation rates, graduation or attendance rates, as well as accountability index values showing school performance on a 0-100 scale.

#### **Teacher Qualification Data**

- Identifies the number and percentage of inexperienced teachers, principals, and other school leaders Reports teachers who are teaching with emergency or provisional credentials
- Includes teachers who are not teaching in the subject or field for which they are certified

# NAEP Data (National Assessment of Educational Progress)

 Provides state results of the national assessment in mathematics and reading every other year in grades 4 and 8

## **Civil Rights Data**

- Provides information on school quality, climate and safety
- Review the table below listing our schools. For the 2019-2020 school year, schools were identified using definitions and labels as required in the Every Student Succeeds Act (ESSA). A Targeted Support and Improvement (TSI) school is one that has at least one underperforming student subgroup. An Additional Targeted Support (ATS) school is one that has three or more underperforming student subgroups. A Comprehensive Support and Improvement (CSI) school is one whose performance is in the lowest 5% of all schools in the state or has a graduation rate at or below 67%. Some schools are not identified with any of these labels. In these cases, no status label is given.

\* Note TSI and ATS definitions were changed for the 2018-19 school year per federal requirements. The new definitions are:

TSI – The school has at least one subgroup performing in the bottom 25% within each applicable accountability index component.

ATS – The school has met the criteria for TSI identification and has at least one subgroup performing at the same level as a CSI school.

In addition to this information in the report it is also important to note other factors that impact student growth and achievement. These areas include:

# **Key Challenge:**

A key challenge for our school is overcoming the limitations in communication that many of our students struggle with. Many students at the Educational Center have limited or no verbal communication skills. Students who have communication impairments utilize visual picture cards, assistive technology, sign language, gestures, and eye gaze to communicate wants, needs, and academic knowledge. While students may fully comprehend a subject, they have difficulties communicating learned knowledge during testing situations. A focus on communication and continuing to improve student ability to communicate what they know is a central part our of work at the Educational Center.

### **Description and Placement:**

The Monroe County Educational Center serves 132 students with moderate to severe cognitive impairments, severe multiple impairments, and Autism Spectrum Disorder. There is a team of 44 classroom staff and 18 ancillary, administrative, and secretarial staff members that support the educational needs of the students. The Educational Center is located in Monroe, MI. Students enrolled at the Educational Center come from all nine local school districts within Monroe County. Enrollment at the Monroe County Educational Center is determined by IEP team decision. The team must determine that the student requires the supports and services of a center-based school in order to access a Free and Appropriate Public Education (FAPE).

# **Educational Center Curriculum:**

The Monroe County Educational Center uses the Essential Elements for the State of Michigan as the guiding framework for instruction. The school use pacing guides with monthly claims and targets as the scope and sequence for the teaching of essential elements to ensure all students have access to the grade level state standards at their instructional level.

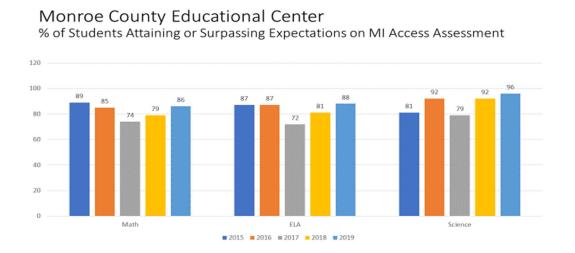

## **School Improvement:**

The primary focus of the Educational Center's School Improvement Plan is to support academic growth for our students in the areas of ELA and Math. Student growth for the school improvement goals is measured by an annual administration of the Educational Center Student Assessment Kit. This assessment is aligned with Michigan's state standards, known as the Essential Elements, and is used to measure growth and predict student achievement on the MI-Access assessment.

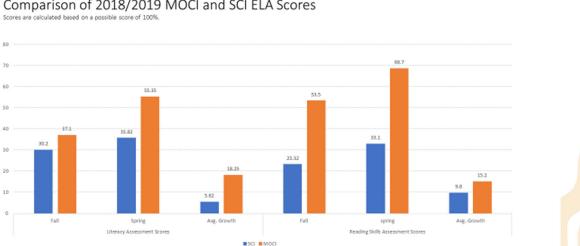

# Student Growth Data:

Student assessment and accountability data for the 2019-2020 school year are not included in the 2020-2021 AER due to federal waivers. The most comprehensive student growth data for students is from the 2018-2019 school year and is represented in the charts below. The absence of student growth data for the 2019-2020 school year is due to the COVID-19 pandemic and the temporary suspension of testing requirements for that school year. For the period of March 16, 2020 through June 30, 2020, students transitioned from in-person instruction to a remote learning format. While state assessments and building-wide assessments were not conducted during this period, Educational Center staff focused on maximizing student and parent engagement in the remote learning process, supporting students' emotional well-being, and monitoring student academic success through informal and classroom-based assessments.

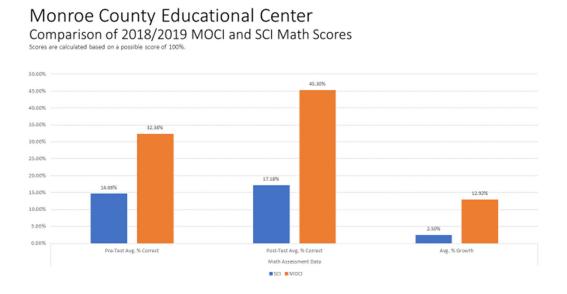

The number of students proficient on the Mi-Access Assessment during the 2018-2019 School Year are as follows:

Comparison of student growth for MOCI and SCI programs in English/Language Arts during the 2018-2019 school year.

Monroe County Educational Center Comparison of 2018/2019 MOCI and SCI ELA Scores Comparison of student growth for MOCI and SCI programs in Mathematics during the 2018-2019 school year.

Based on the data, targeted areas for improvement are increasing scores in both mathematics and ELA.

# School Improvement Goals for the 2020/2021 school year are as follows:

By May 2021, the average score on the monthly math post test will increase by at least 5% for students in the SCI program, as measured by the Educational Center Student Assessment Kit.

By May 2021, the average score on the monthly math post test will increase by at least 10% for students in the MOCI program, as measured by the Educational Center Student Assessment Kit.

By May 2021, the average score on the ELA Literacy Assessment will increase by at least 5% and the average score for the Reading Skills Assessment will increase by at least 7.5% for students in the SCI program, as measured by the Educational Center Student Assessment Kit.

By May 2021, the average score on the the ELA Literacy Assessment will increase by at least 15% and the average score for the Reading Skills Assessment will increase by at least 15% for students in the MOCI program, as measured by the Educational Center Student Assessment Kit.

## **Representation at Family Events and Conferences:**

As previously mentioned, one of the points of pride at the Educational Center is our family engagement. The Educational Center had 132 students enrolled during the 2019-2020 school year. The following is a breakdown of the number of students who had one or more family members attend an event:

Annual Open House: 54 (41%) Annual IEP meeting: 116 (88%) Annual Holiday Family Event (December): 200+ attendees

In addition to these in-person events, the Educational Center held virtual events after the school closure on March 13.

Virtual Family Night: 32

Virtual Prom: 89

Virtual Parent Information Meetings:

March: 133 May: 162

June: 97

# Post-Secondary Transition Program Enrollment:

The Monroe County Educational Center also works in partnership with the Transition Center. During the 2019-2020 School Year there were 89 students enrolled at the Monroe County Transition Center.

The students and staff at the Monroe County Educational Center look forward to continuous improvement and student growth in the upcoming school year.

Sincerely,

William Hite, Principal

Sarah Yu, Assistant Principal
