7540.04 - **STAFF NETWORK AND INTERNET ACCEPTABLE USE AND SAFETY**

Advances in telecommunications and other related technologies have fundamentally altered the ways in which information is accessed, communicated, and transferred in society. Such changes are driving the need for educators to adapt their means and methods of instruction, and the way they approach student learning, to harness and utilize the vast, diverse, and unique resources available on the Internet. The Board of Education is pleased to provide Internet service to its staff. The Board encourages staff to utilize the Internet in order to promote educational excellence in our schools by providing them with the opportunity to develop the resource sharing, innovation, and communication skills and tools that will be essential to life and work in the 21st century. The Board encourages the faculty to develop the appropriate skills necessary to effectively access, analyze, evaluate, and utilize these resources. The instructional use of the Internet will be guided by the Board's policy on Instructional Materials.

The District's Internet system has not been established as a public access service or a public forum. The Board has the right to place restrictions on its use to assure that use of the District's Internet system is in accord with its limited educational purpose. Staff use of the District's computers, network, and Internet services (Network) will be governed by this policy and the related administrative guidelines, and any applicable employment contracts and collective bargaining agreements. The due process rights of all users will be respected in the event there is a suspicion of inappropriate use of the Network. Users have no right or expectation to privacy when using the Network including, but not limited to, privacy in the content of their personal files, e-mails, and records of their online activity while on the Network.

The Internet is a global information and communication network that provides an incredible opportunity to bring previously unimaginable education and information resources to our students. The Internet connects computers and users in the District with computers and users worldwide. Through the Internet, students and staff can access up-to-date, highly

relevant information that will enhance their learning and the education process. Further, the Internet provides students and staff with the opportunity to communicate with other people from throughout the world. Access to such an incredible quantity of information and resources brings with it, however, certain unique challenges and responsibilities.

First, and foremost, the Board may not be able to technologically limit access to services through the Board's Internet connection to only those services and resources that have been authorized for the purpose of instruction, study and research related to the curriculum. Unlike in the past when educators and community members had the opportunity to review and screen materials to assess their appropriateness for supporting and enriching the curriculum according to adopted guidelines and reasonable selection criteria (taking into account the varied instructional needs, learning styles, abilities, and developmental levels of the students who would be exposed to them), access to the Internet, because it serves as a gateway to any publicly available file server in the world, will open classrooms and students to electronic information resources which have not been screened by educators for use by students of various ages.

Pursuant to Federal law, the Board has implemented technology protection measures that block/filter Internet access to visual displays that are obscene, child pornography or harmful to minors. The Board utilizes software and/or hardware to monitor online activity of staff members to restrict access to child pornography and other material that is obscene, objectionable, inappropriate and/or harmful to minors.

The technology protection measures may not be disabled at any time that students may be using the Network, if such disabling will cease to protect against access to materials that are prohibited under the Children's Internet Protection Act. Any staff member who attempts to disable the technology protection measures will be subject to disciplinary action, up to and including termination.

The Superintendent or designee may disable the technology protection measure to enable access for bona fide research or other lawful purposes.

Staff members will participate in professional development programs in accordance with the provisions of law and this policy. Training shall include:

- A. the safety and security of students while using e-mail, chat rooms, social media and other forms of direct electronic communications;
- B. the inherent danger of students disclosing personally identifiable information online;
- C. the consequences of unauthorized access (e.g., "hacking"), cyberbullying and other unlawful or inappropriate activities by students or staff online; and
- D. unauthorized disclosure, use, and dissemination of personal information regarding minors.

Furthermore, staff members shall provide instruction for their students regarding the appropriate use of technology and online safety and security as specified above, and staff members will monitor students' online activities while at school.

Monitoring may include, but is not necessarily limited to, visual observations of online activities during class sessions; or use of specific monitoring tools to review browser history and network, server, and computer logs.

The disclosure of personally identifiable information about students online is prohibited.

Building principals are responsible for providing training so that Internet users under their supervision are knowledgeable about this policy and its accompanying guidelines. The Board expects that staff members will provide guidance and instruction to students in the appropriate use of the Internet. Such training shall include, but not be limited to, education concerning appropriate online behavior, including interacting with other individuals on social networking websites and in chat rooms, and cyberbullying awareness and response. All Internet users are required to sign a written agreement to abide by the terms and conditions of this policy and its accompanying guidelines.

Staff members are responsible for good behavior on Board's computers/network and the Internet just as they are in classrooms, school hallways, and other school premises and school sponsored events. Communications on the Internet are often public in nature.

Staff members shall not access social media for personal use on the District's network, and shall access social media for educational use only after submitting a plan for that educational use and securing the Principal's approval of that plan in advance.

General school rules for behavior and communication apply. The Board does not sanction any use of the Internet that is not authorized by or conducted strictly in compliance with this policy and its accompanying guidelines. Users who disregard this policy and its accompanying guidelines may have their use privileges suspended or revoked, and disciplinary action taken

against them. Users granted access to the Internet through the Board's computers assume personal responsibility and liability, both civil and criminal, for uses of the Internet not authorized by this policy and its accompanying guidelines.

Social Media Use

An employee's personal or private use of social media, such as Facebook, Twitter, MySpace, blogs, etc., may have unintended consequences. While the Board respects its employees' First Amendment rights, those rights do not include permission to post inflammatory comments that could compromise the District's mission, undermine staff relationships, or cause a substantial disruption to the school environment. This warning includes staff members' online conduct that occurs off school property including from the employee's private computer. Postings to social media should be done in a manner sensitive to the staff member's professional responsibilities.

In addition, Federal and State confidentiality laws forbid schools and their employees from using or disclosing student education records without parental consent. See Policy 8330. Education records include a wide variety of information; posting personally identifiable information about students is not permitted. Staff members who violate State and Federal confidentiality laws or privacy laws related to the disclosure of confidential employee information may be disciplined.

Use of Artificial Intelligence/Natural Language Processing Tools

Staff are permitted to use Artificial Intelligence and Natural Language Processing (NLP) tools (collectively, "AI/NLP tools") to accomplish their job responsibilities so long as the use is ethical, responsible, and does not violate any provisions of this policy (e.g., it does not infringe on students' or staff members' privacy rights, violate their duty to maintain confidentiality related to personally identifiable information, etc.).

With respect to students, it is the Board's policy that they are required to rely on their own knowledge, skills, and resources when completing school work. In order to ensure the integrity of the educational process and to promote fair and equal opportunities for all students, except as outlined below, students are prohibited from using AI/NLP tools to complete school work. The use of AI/NLP tools without the express permission/consent of a teacher is considered to undermine the learning and problem-solving skills that are essential to a student's academic success and that the staff is tasked to develop in each student. Consequently, students are encouraged to develop their own knowledge, skills, and understanding of course material rather than relying solely on AI/NLP tools, and they are expected to ask their teachers when they have questions and/or need assistance. A student's unauthorized use of AI/NLP tools is considered a form of plagiarism and any student found using such tools without permission or in a prohibited manner will be disciplined in accordance with the Student Code of Conduct.

Notwithstanding the preceding, students are allowed to use AI/NLP tools in the school setting if they receive prior permission/consent from their teacher, so long as they use the AI/NLP tools in an ethical and responsible manner. Teachers have the discretion to authorize students to use AI/NLP tools for the following uses:

- A. Research assistance: AI/NLP tools can be used to help students quickly and efficiently search for and find relevant information for their school projects and assignments.
- B. Data Analysis: AI/NLP tools can be used to help students to analyze, understand, and interpret large amounts of data, such as text documents or social media posts. This can be particularly useful for research projects or data analysis assignments – e.g., scientific experiments and marketing research.
- C. Language translation: AI/NLP tools can be used to translate texts or documents into different languages, which can be helpful for students who are learning a new language or for students who are studying texts written in a different language.
- D. Writing assistance: AI/NLP tools can provide grammar and spelling corrections, as well as suggest alternative word choices and sentence structure, to help students improve their writing skills.
- E. Accessibility: AI/NLP tools can be used to help students with disabilities access and understand written materials. For example, text-to-speech software can help students with specific learning disabilities or visual impairments to read texts and AI-powered translation tools can help students with hearing impairments to understand spoken language.

As outlined above, under appropriate circumstances, AI/NLP tools can be effectively used as a supplement to and not a replacement for traditional learning methods. Consequently, with prior teacher permission/consent, students can use AI/NLP tools to help them better understand and analyze information and/or access course materials. If a student has any questions about whether they are permitted to use AI/NLP tools for a specific class assignment, they should ask their teacher.

Users who disregard this policy and its accompanying guidelines may have their use privileges suspended or revoked, and disciplinary action taken against them. Users are personally responsible and liable, both civilly and criminally, for uses of District Information & Technology Resources that are not authorized by this policy and its accompanying guidelines.

The Board designates the Superintendent as the administrator responsible for initiating, implementing, and enforcing this policy and its accompanying guidelines as they apply to the use of the Network and the Internet for instructional purposes.
