

HOPE & Brain Architecture Game Workshop available in Monroe County

HEALTHY OUTCOMES FROM POSITIVE EXPERIENCES

HOPE training brings to life new research from Dr. Sege and his partners at Tufts University about how positive childhood experiences drive healthy development and mitigate the effects of adverse childhood experiences (ACEs).

There are Four Building Blocks of HOPE that help children grow into healthy, resilient adults: Relationships; Safe, equitable, stable environments; Social and civic engagement; and Emotional growth.

THE BRAIN ARCHITECTURE GAME

The Brain Architecture Game is a tabletop game experience that builds understanding of the powerful role of experiences on early brain development—what promotes it, what derails it, with what consequences for society. This training introduces the basic early childhood science concepts behind the game and outlines the basic goal and rules of the game. The goal is to build a brain that is as tall as possible, which represents functionality, and sturdy, which represents the ability to withstand stresses.

June 20, 2022 | 8am - 4pm | @ Michigan Works
1531 N. Telegraph Rd., Suite D, Monroe, MI 48162
